And then; Everything went *DOWN!!!*

(Prayers, Chants, Self-Medicating, Meditating, doing Yoga, Drinking something STRONG...)

THIS IS THE MOMENT WHERE I BECAME URGENTLY IN NEED OF AN IMMEDIATE AND LARGE DOSE OF MEDICATION!!!

Meanwhile, back at the Ranch... - Lil Dawgy (and friends) were BUSY!!!

But, as *always*;

AFTER-THE-CLOUD-AND-RAIN-COMES-THE-SUNSHINE!!!

So, an element of *patience* actually *paid off!!!* (in the end); All my playing with **packet tracer** and learning Ipv4 **subnetting** had *actually Paid Off!!!* - I had *succeeded* in Creating a LAN setup where I could run a **tftp** server (I had done *some* experiments with **ftp**; - but had *no success!!!* Having done (yet) *more* reading, I came to the conclusion that a **tftp** server was the *Only Soution!!!* My network is divided into three **VLAN's** (at the moment), Two of them are in use as *internet* and *intranet*; the third

and (sometimes) *fourth* Vlans are merely for all that '*Tekky Head*' computer 'Geekin' sort of agendas. It is nice to try out ideas on *other* equipment *besides* the stuff which we *need* for all of our Day-to-Day stuff such as online banking, google, skype etc etc...
